# CONTENTS

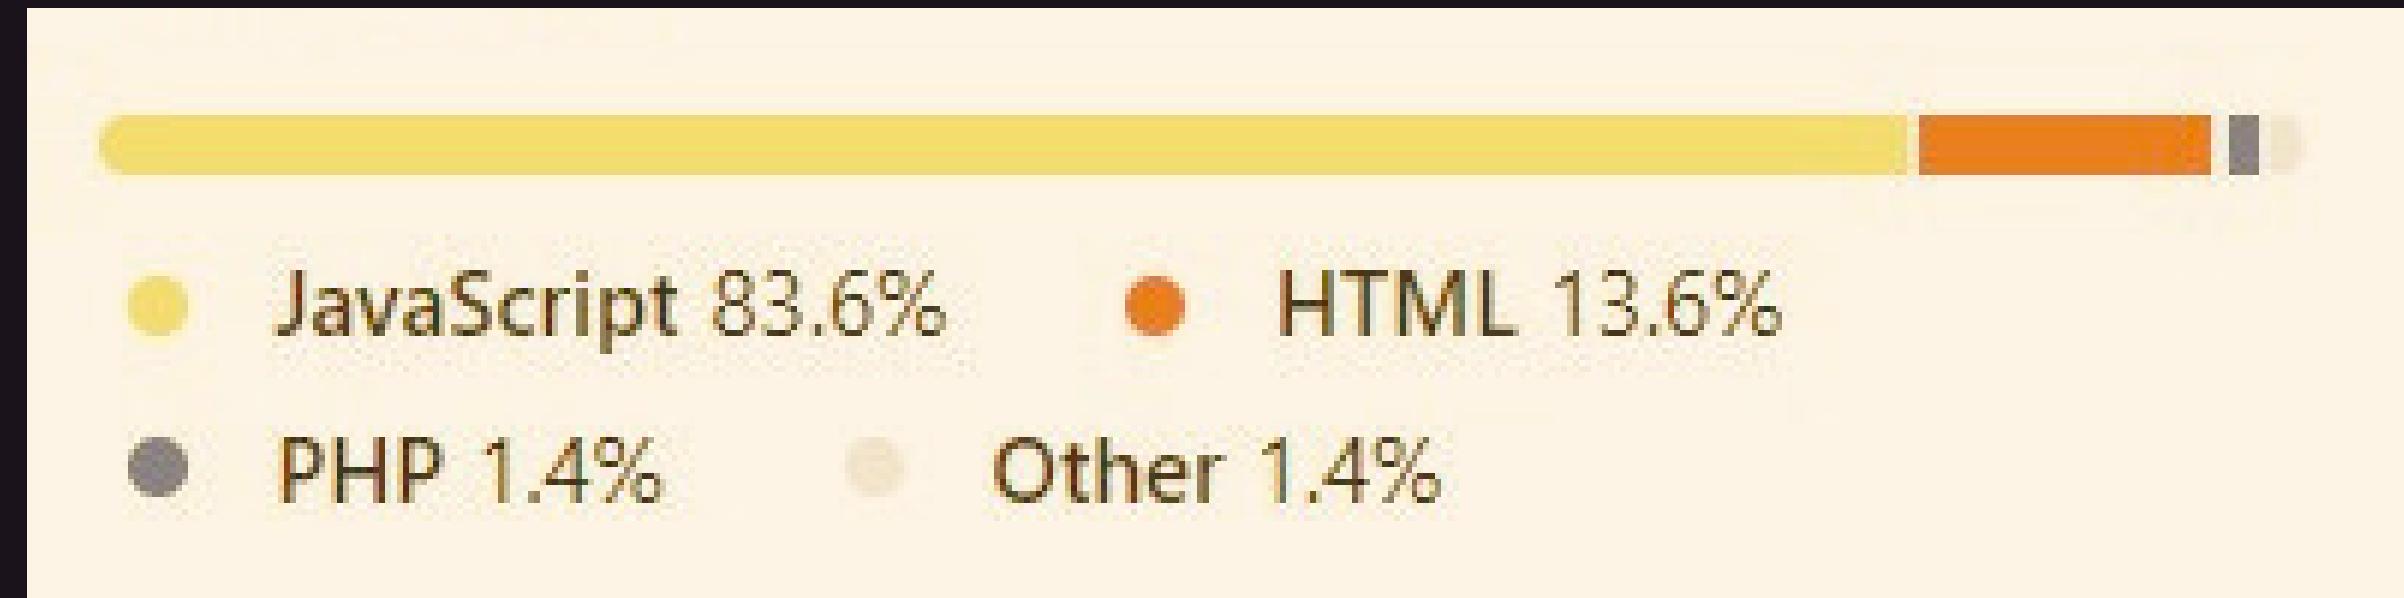

# PROBLEM STATEMENT

**One common challenge faced by users is converting HTML documents to DOCX format. While both formats serve different purposes, there are scenarios where it's necessary to convert HTML content into a more widely used and editable format like DOCX. The problem arises due to the fundamental structural differences between HTML and DOCX files.**

- **Preserving Formatting and Styles**
- **Dealing with Hyperlinks and References**
- **Supporting Complex HTML Structures**
- **Minimizing Data Loss**
- **Scalability and Performance**

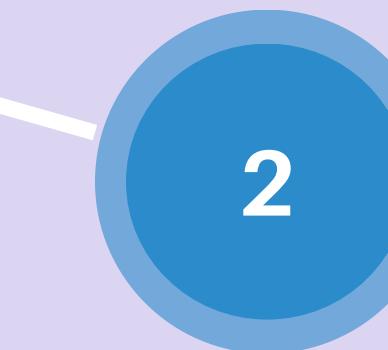

# ***TECHSTACK USED***

# OUR APPROACH

Made database in MySql and  
PHPMyAdmin

Integrated PHP and JavaScript to  
fetch data from database

Used JSZip library to create , &  
edit zip file

Created HTML to doc converter  
using JavaScript

User is able to download the  
converted file

## OUR WEBAPP

The illustration shows a large central screen displaying a blue cloud with an upward-pointing arrow, symbolizing file upload. A woman in a red top and black skirt stands to the left, holding a yellow folder and pointing towards the screen. Another woman in a red top and dark pants is seated on the floor to the right, working on a laptop. Above the screen, there are icons for video, music, and images. The background features stylized blue leaf patterns.

The screenshot shows the Microsoft Word ribbon interface. The 'Normal' style is selected in the Styles group. The ribbon also includes sections for Editing, Voice, Sensitivity, Editor, Reuse Files, and Add-ins. The document content area contains the following text:

Convert HTML to DOCX

Documento de prueba por [Amal Amrani](#)

Probando docx con una negrita cursiva dentro

Tristique sed netus cubilia himenaeos nulla non nam auctor pharetra cras posuere, duis feugiat mollis ullamcorper etiam pellentesque fringilla libero interdum leo praesent, nisi sollicitudin nullam senectus vel viverra quis euismod eleifend ornare. Pellentesque fames egestas montes volutpat aliquam praesent litora auctor nisl, cum semper class tortor ad quam commodo imperdiet. Hac iaculis himenaeos montes

A screenshot of the Microsoft Word ribbon interface. The ribbon tabs visible are Clipboard, Font, Paragraph, Styles, Editing, Select, Dictate, Sensitivity, Editor, Reuse Files, and Add-ins. The main content area displays a section titled "Probando tablas" (Testing tables) containing the text "Una tabla de ejemplo anidada dentro de otro contenedor" (An example table nested within another container). Below this text is a 3x4 nested table structure:

title1	title2	title3	title4
col1	col2	col3	col4
f2col1	f2col2	f2col3	f2col4

Below the table, the message "IMAGE FORMAT NOT AVAILABLE!" is displayed.
